Continuation of 2. NOTE: amendment to claims do dnot place them in condition for allowance. Applicants have amended claims in direct response to the reasons for rejection as provided by the examiner in the remarks... in spite of this, amended language is broad. In contrast to the argument of a receiver continuously monitoring control channel of McCalley, the amended limitation, "contunuously operative" can be interpretted as a narrowband receiver continuously monitoring index stream. McCalley anticipates the continuously operating receiver. Intermittently operative second input stream corresponds to the second signal processing which is not continuously operating. It operates only when addressing information is provided by the control channel. refer to col. 8, lines 6-67 and col. 9, lines 18-29. Therefore, the rejection is proper and amendment does not place the claims in condition for allowance.
